

**ADJUNCT PROFESSOR**  
**MATH, SCIENCE, AND INFORMATION TECHNOLOGY**

**Job Summary**

As an adjunct professor, you work with students at Barber-Scotia College to provide them with the knowledge and training they need to be successful in their chosen careers. Your ability to work on a course-by-course basis allows you to choose when you want to work and when you don't. Adjunct professors can reach out to students personally without the worries of research, tenure, and development that full-time professors have. You'll enjoy the prestige of working for an educational institution with the freedom to teach your specialties in the way you are most comfortable. Enhance the lives of every student through quality education as an adjunct professor.

**Job Responsibilities**

- Teach specific classes in your chosen field in innovative, engaging ways that help students learn and encourage them to attend class regularly.
- Develop course outlines, curriculum, and instructional materials to improve the processes and courses offered to students as they seek their chosen degree.
- Advise students about career choices, advancement, progress, and goal attainment in your course regarding their field of study.
- Assign grades and assess student progress, potential, and achievement in concrete, understandable ways to help the student progress toward a degree.
- Lecture and teach the material presented in the course syllabus and outline professionally and engagingly.
- Participate in continuing education classes to guarantee that your knowledge and teaching methods are up-to-date and likely to help students succeed.
- Maintain appropriate records in an organized, efficient manner for every individual class taught, and have this information always prepared for students.
- Cultivate a desire to build relationships, find solutions to problems, and always be helpful and friendly.

**Job Qualifications**

Required:

- Terminal or master's degree in the appropriate field.
- Demonstrated success in appropriate computer programs and current technology.
- Flexible schedule and ability to teach several different courses at once.

Preferred:

- Previous experience at an educational institution.
- Solid rapport and relationships with past students and colleagues.
